

SAFETY, HEALTH, ENVIRONMENTAL, RESPONSIBLE CARE, PROCESS SAFETY & QUALITY, (SHERQ) POLICY

NCP Chlorchem is a manufacturer and distributor of Chlor Alkali products and derivatives targeted at the water treatment, industrial, paper and chemical markets. We are dedicated to providing sustainable quality products and services, which meet or exceed the expectations of our customers. We are committed to conducting business ethically, ensuring that the health and safety of our employees, community and other stakeholders are protected, the integrity of the chemical plants and processes is maintained and the environment is preserved.

OUR COMMITMENT THROUGH VISIBLE AND ACTIVE LEADERSHIP INCLUDE:

- Identification, reduction, mitigation or elimination of SHERQ risks and hazards to ensure legal and other compliance and thereby reducing the overall impact to employees, the community, neighbours and the environment whilst meeting our customer requirements.
- Implementation of a Process Safety Program to prevent process safety incidents by having facilities designed and built according to inherently safer design, sound engineering practice, operated and maintained properly and periodically reviewed for conformance.
- Implementation of management systems as per recognised industry standards and best practices which are regularly audited to ensure continual improvement for enhanced SHERQ and organisational performance.
- Setting and ensuring that our specific objectives and management programs address Safety, Health, Environmental and Quality requirements.
- Prevention of environmental degradation by promoting the sustainable use and conservation of resources at every stage of the life cycle of our products.
- Champion the principles of Responsible Care®, including the prevention of pollution, reporting our progress and ensuring continual improvement.
- Promoting dialogue on all SHERQ matters with all employees and other identified stakeholders.
- Identification and provision of the necessary resources required to ensure the successful implementation and continued adherence to the requirement of the SHERQ systems.
- Adequate training of all employees and service providers on SHERQ best practices.
- Effective response to emergencies involving our employees, operations and products.
